## PROJECT

<b>Title</b>	: AML-Customer Due Diligence
<b>Client</b>	: The United Services Automobile Association (USAA)
<b>Technologies Used</b>	: Java, IBM DataStage, REST API, SQL
<b>Framework</b>	: Spring Boot, Wicket, React JS.
<b>IDE</b>	: IntelliJ, Eclipse, PyCharm, WebStorm & IBM DataStage
<b>Version Control</b>	: RTC, GIT
<b>Log Monitor</b>	: Splunk, KIBANA
<b>Deployment Tools</b>	: UCD, AWC
<b>CI/CD</b>	: GitLab CI/CD
<b>Database</b>	: Oracle 11g, DB2
<b>Cloud</b>	: OpenShift, AWS
<b>Domain</b>	: AML and Bank
<b>Operating System</b>	: Windows 10 & UNIX
<b>Team Size</b>	: 2
<b>Role</b>	: Developer
<b>Responsibilities</b>	:

- Understanding of project architecture shared by the customer and industry-standard best practices followed in the project.
- Effective interaction and coordination with the business team to comprehend the requirements and translate them into quality deliverables.
- Analyze and explain the requirements to team members and clarify the queries.
- Implemented APIs using Microservice and Spring boot.
- Created UI using REACTJS based front end application which manages the RESTful APIs.
- Created/Managed ETL jobs by using the IBM DataStage tool for AML data collection purposes.
- Created communication software to communicate the data files from People soft to ETL using java.
- Created monitoring tools using PowerShell script to trigger ETL jobs from Control-M.
- Created multiple watchers using elastic query in Kibana dashboard to monitor the production issues.
- Basic Knowledge in MDB, KAFKA, Kubernetes, Docker.
- Created control – M jobs to automate the process.
- Managed deployment procedures for Java App and DataStage Jobs using IBM Urban Code Deploy.
- Worked on writing JUnit for code coverage using Mockito.
- Followed Agile methodology for client deliverables.
