

# Lokesh Dhanasekar

29/6, Nandhi Loop Street, CIT Nagar, Nandhanam, Chennai, TamilNadu, India.

MOBILE: +91 9677116689 E-MAIL: [dlokesh@outlook.com](mailto:dlokesh@outlook.com)

## SUMMARY

- Five plus years of experience as full stack developer in application development using J2EE and IBM ETL Data Stage, while implementation, testing and troubleshooting.
- Strong knowledge of technical specifications, workflow development and QA.
- Participated in analyzing business requirements and recommending appropriate technologies.
- Good experience in coordinating with various teams like Deployment, Testing Team to speed up the development process.
- Proficient in communication, interpersonal and organizational skills.

## PROFESSIONAL EXPERIENCE

### HCL Technologies

Senior Software Engineer (February 2015 – Till Now)

**HCL Technologies Mexico** (July 2017 – June 2019)

**Holding B1/B2 Visa (USA)** – Valid till 2028.

## NATURE OF WORK

Developed JAVA application which process and monitor the activities performed in the process and load the file details in the database using various REST API's.

## ROLES & RESPONSIBILITIES

Developed complex applications and updates throughout SDLC, including analyzing business requirements, developing technical specifications, planning, coding, testing implementation and QA.

- Participate in scoping meeting to identify the requirement for new projects and reconfirm requirement with relevant stakeholders.
- Analyzing the Existing code and involved in modifying various classes and methods according to the new business needs.
- Created various REST API's for GET and POST requests as per the Business requirements.
- Created Database Objects like tables, Views as per the Business requirements.
- Developed Dashboard using Ext JS which will retrieve the data from the database using REST API's.
- Involved in writing technical design document, Test cases and performed unit testing
- Supported project leads & project managers in preparation of project review deliverables (like project ppt, audit documents, etc.).

## PROJECT

<b>Title</b>	: AML - Customer Due Diligence
<b>Technology Used</b>	: Java, React JS, IBM DataStage, REST API, SQL
<b>Framework</b>	: Spring Boot, Wicket, EXT js.
<b>IDE</b>	: IntelliJ, Eclipse & IBM DataStage
<b>Version Control</b>	: RTC, GIT
<b>Log Checker</b>	: Splunk, KIBANA
<b>Client</b>	: The United Services Automobile Association (USAA)
<b>Deployment Tools</b>	: UCD, Open shift, AWC
<b>Devops Tools</b>	: Kubernetes-docker and AWS
<b>Database</b>	: Oracle 11g, DB2
<b>Domain</b>	: AML and Bank
<b>Operating System</b>	: Windows 10 & UNIX
<b>Team Size</b>	: 2
<b>Role</b>	: Developer

### Description :

- Created Micro Services for USAA Banking which collects customer's KYC details for AML verification purpose using Spring boot.
- Created UI using REACT and EXT JS based front end application which handles the RESTful API's.
- Created/Managed many ETL jobs by using IBM DataStage tool for AML data collection purpose.
- Created communication software to communicate the data files from People soft to ETL using java.
- Created monitoring tools using PowerShell script to trigger ETL jobs from Control-M.
- Created multiple watchers using elastic query in Kibana dashboard to monitor the production issues.
- Basic Knowledge in MDB and KAFKA.
- Basic Knowledge in Kubernetes-Docker and Amazon web services.
- Created various control – M jobs to automate the process.
- Handled deployment procedures for Java App and DataStage Jobs using IBM Urban Code Deploy.

## ACADEMIC RECORD

Course	Institution	Month & Year	GPA
Master of Computer Application	College of Engineering, Guindy. Anna University	MAY 2014	75.60
